TECHNICAL SKILLS

AI Systems: Multi-agent orchestration infrastructure, tool-use workflows, context assembly, evaluation harnesses, approval-gated execution and permissions, observability via receipt-chained run logs
Languages: C (exposed), C++ (exposed), Python (primary), TypeScript (primary), Bash, SQL, JavaScript, Java, Go
Systems: Linux (Fedora daily driver, WSL2 Ubuntu), Docker, Tailscale/WireGuard zero-trust networking, Ollama LLM inference server (RTX 3070 Ti, operated), Bash/Zsh scripting
Data & Databases: PostgreSQL, Relational Database Design, SQL Querying, Data Modeling, Schema Migrations, Data Validation, Data Transformation
Libraries / Tools: Pandas, Matplotlib, PyTorch, Drizzle ORM, Git, AI agent tooling (Claude Code, Codex CLI)
Frameworks: Nuxt.js, Vue.js
Workflow: Team-Based Development

PROJECTS

LeafLink Mar 2026 - Present
PostgreSQL, SQL, Python, TypeScript, Drizzle ORM, Nuxt.js
- 2nd Place, week-long hackathon, 4-person team: wrote about half the code; shipped LeafLink end to end in seven days.
- Real-time WebSocket feed and Leaflet map UI with tag/category search across structured event data.
- Designed the Postgres tags model: text-array column on posts backed by a GIN index; built the search endpoint filtering by keywords and tags against it.
- One shared validation schema across client and server (TypeScript/Nuxt.js); cut invalid writes at the boundary.

SideQuests! Nov 2025 - Present
PostgreSQL, TypeScript, JavaScript
- Co-built in a 2-person team: peer-to-peer quest-matching platform; shipped working MVP in 24 hours; 2nd Place, Hack New Paltz.
- Relational PostgreSQL data model and backend structure for users, quests, and activity data.

EDUCATION

SUNY New Paltz | New Paltz, NY
B.S. in Computer Science | Expected December 2027
- **Relevant Coursework:** Data Structures & Algorithms, Assembly Language & Computer Architecture, Computer Vision, Discrete Mathematics, Programming Languages, Language Processing
- **Honors:** Dean's List

LEADERSHIP & ACADEMIC EXPERIENCE

Math Club | Vice President Sep 2026 - Present
- VP Events: coordinate event logistics with other student organizations and campus offices.
- Own the event calendar end to end: space requests, CampusGroups submissions, run-of-show, tech.

Eleet Coders | Council of Organizations Representative Jan 2026 - Present
- Council representative: cross-club governance, event planning, resource allocation.

CS Teams | Treasurer Oct 2024 - Present
- Own budgeting and operational planning for technical events.

Assembly Language and Computer Architecture Coursework | SUNY New Paltz
CPS330
- Number systems, machine language, assembly language, linking and loading, instruction set architecture, microarchitecture, and memory systems.
- Hand assembly of assembly programs and hand compilation of C code; interpreter, assembler, and linker projects.
